TECHNICAL INFO

Invertech

PATENTED TECHNOLOGY, COMBINING PU LACQUER AND EMBOSSING.

In 2020, Lentex developed Invertech for sheet vinyl, a patented, innovative production process where PU lacquer and mechanical embossing are consecutively applied for aesthetic and functional benefits.

INVERTECH

An even, dirt-resistant layer

The PU lacquer formula is evenly distributed over the entire surface of our products, preventing glossy marks or cloudy spots caused by excessive or insufficient coverage. Invertech technology guarantees a durable, dirt- and scratch-resistant protective layer with an attractive structure which is resistant to handling, installation and daily use.

TECHNICAL INFO

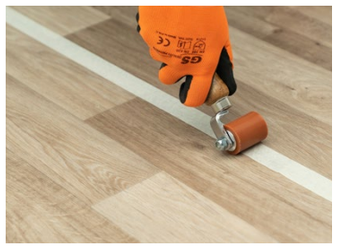

Cold welding
Invisiweld

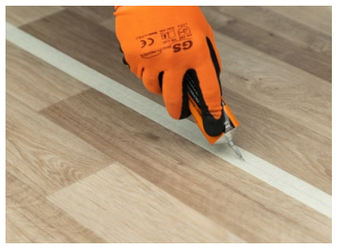

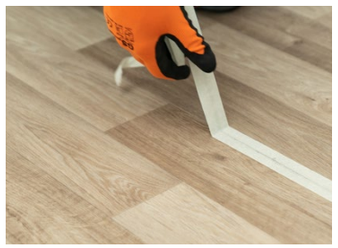

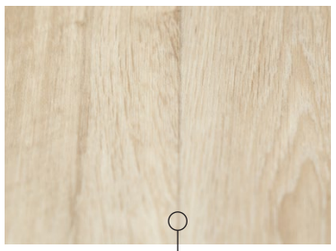

Invisiweld technology gives the ability to achieve an almost imperceptible seam with all IVC Commercial Heterogeneous Vinyl floor coverings. Fast, clean and easy to use, Invisiweld is economical and leaves a strong and watertight seam.

Steps

Invisiweld

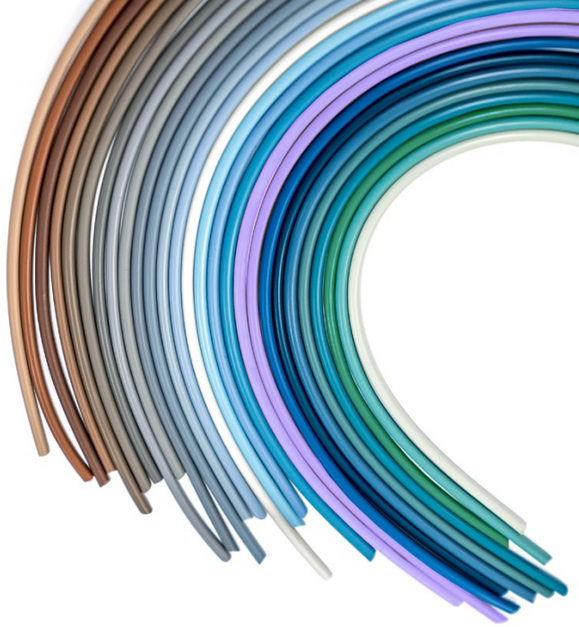

Invisiweld

TECHNICAL INFO

Hot welding

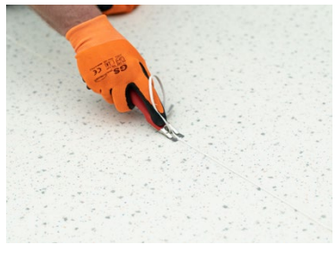

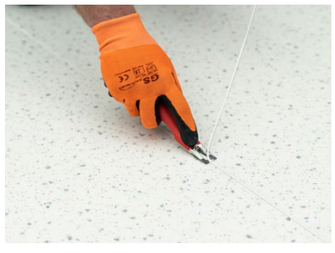

ø 4 mm x 100 m length

We offer a wide range of welding rods for colour-matching or contrasting seams for our heterogenous sheet vinyl. Either way, the result will be a floor that is both strong, watertight and beautiful.

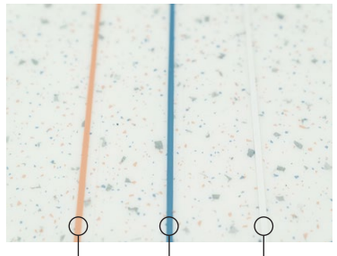

Steps

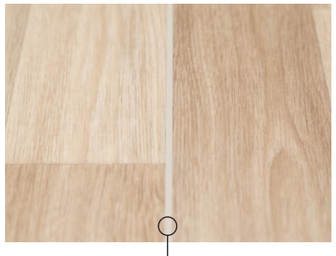

Set the welding gun to level 5 at 440–450 °C and work at 3m per minute.

Contrasting welding

Colour-matched welding

ONEHOME

Sustainability strategy

In 2022 Unilin launched One Home, our group-wide **sustainability strategy** with ambitious targets in several domains. We look into the environmental impact of our products and production processes, but also at how we live at home, at work and on our planet.

PLANET HOME

The Planet Home pillar groups our environmental efforts. The basis for these is the environmental policy applicable to all of Mohawk Industries' segments. It addresses climate change, water, circularity, supply chain management, and environmental responsibility. At Unilin, we put an additional focus on climate change and circularity. We are committed to supporting the global transition to more sustainable products and production systems by **reducing fossil fuel use, lowering the lifecycle carbon footprint of our products**, and improving their **recyclability** while also assuring **proper environmental plant management**.

YOUR HOME

As part of our sustainability strategy, the Your Home pillar focuses on how our products contribute to **creating healthy, comfortable, and sustainable living spaces**. Since we spend most of our lives indoors, whether at home, in classrooms, offices, stores, or hospitals, the quality of these environments directly impacts our well-being.

OUR HOME

Our Home is a commitment to our people and our community. A thriving, future-proof company is built on the health, well-being, development and engagement of its employees.

Across Mohawk Industries, the foundation in this field is formed by our health and safety, human rights, and training and development policies.

At Unilin, we translate these into our focus on creating a safe, inclusive, diverse, and respectful workplace. A place where everyone can find challenges and continue to grow, **a second home for 7800 employees**. We also work closely with our suppliers and engage with local communities around our sites, aiming to create lasting, positive social impact wherever we operate. We share our home.
